

Regarding XM Radio:

XM provides an unmatched ability to keep up with key national and local information, business, stock market information, etc that I could not otherwise get from other radio services. XM is a choice and it is a product that is purchased same as cable TV or Satellite TV. It should not be restricted any differently, and I would be amazed if we allow the NAB to redirect this service.

XM is here to stay, and I do not see how I worked / traveled without it before.

KEEP XM THE WAY IT IS!!!
